

## Leaderra – Financial & Advisory Landing Page (Sharpened Version)

### HERO

Your advisors shouldn't discover misalignment live.

If you generate consistent inbound leads but too many conversations stall, drag, or go nowhere — you don't have a traffic problem. You have a conversation control problem.

Leaderra protects advisor time by controlling who reaches the call.

[ Book an Advisor Time Audit ]

### THE PROBLEM

Inbound volume doesn't guarantee progression.

Across financial and advisory businesses:

- Prospects inquire without urgency
- Expectations aren't aligned
- Documentation isn't prepared
- Decision authority isn't clear
- Conversations turn into exploration

What follows:

- Long advisory calls
- Weak progression
- Low close consistency
- High cost per converted client

Paid leads become expensive conversations instead of profitable outcomes.

### WHERE IT BREAKS

1. Prospect submits inquiry
2. Meeting gets scheduled
3. Misalignment discovered live
4. Deal slows, stalls, or drops

Outcome: Advisor time burned. Conversion progression weakens. ROI shrinks.

## **WHAT LEADERRA DOES**

Leaderra operates before the advisory call.

We:

- Align expectations
- Confirm documentation readiness
- Validate decision intent

Only prospects who demonstrate readiness reach the advisor calendar.

Advisors focus on closing — not discovery.

## **HOW WE COMPARE**

Lead Generation – Drive traffic – Focus on volume – Advisors filter live

Appointment Setting – Fill calendars – Focus on meetings – Advisors filter live

Leaderra – Control conversation readiness – Focus on progression probability – Advisors focus on closing

## **WHAT CHANGES**

- Higher quality conversations
- Stronger close progression
- Shorter advisory cycles
- More revenue per advisor hour

Less noise. More movement.

## **WHO THIS IS FOR**

- Financial advisors with inbound flow
- Loan & mortgage brokers
- Insurance agencies
- Real estate advisory firms
- Credit / funding consultants
- 40–200 inbound inquiries per month
- Advisors overloaded with exploratory calls

## WHO THIS IS NOT FOR

- Businesses under 30 inbound inquiries per month
- Large enterprise financial institutions
- Firms without structured advisory calls
- Companies looking only for more traffic

## WHAT HAPPENS IN THE FIRST CALL

We review:

- Monthly inbound volume
- Cost per lead
- Current close progression
- Advisor time allocation
- Where deals stall

The goal is clarity around conversion efficiency — not financial underwriting.

## FAQ

How is this different from lead generation or SDR?

We don't generate traffic or book meetings. We control readiness before meetings happen.

Will this reduce the number of meetings?

Yes — intentionally. The goal is fewer unproductive calls and stronger progression.

Do you replace our advisors?

No. We protect their time.

## FINAL CTA

Stop letting advisors qualify what should be screened earlier.
